

PLANT WG SPECIFIC SAFETY STANDARDS

This document is to notify contractors and vendors of the safety requirements while visiting or executing the work at Plant WG. This document guidelines are to be reviewed in addition to the [Corporate Shaw Contractor/Vendor Safety](#). Both training courses shall be reviewed and signed off annually by all vendors and contractors.

All vendors/contractors must sign in the guardhouse located at:
15228 Bonavista Ave
Santa Fe Springs, CA 90670.

The PPE (Personal Protective Equipment) listed below must be always worn while at the plant and are the minimum requirements for Plant WG. Additional job specific PPE may be required before work is permitted to begin. All vendors/contractors must coordinate tasks with plant designee before dispatching employees to ensure PPE is adequate for task and plant requirements. It is the responsibility of the Vendor/Contractor to provide all PPE as required.

1. High Visibility Vest.
2. ANZI Z 87+ eye protection.
3. Hearing Protection in designated areas (Verification with plant contact is required before work begins).
4. Other PPE related to the task being performed may be required. Please contact your Plant Contact.

In general, no jewelry is allowed at Plant WG. Stud earrings are allowed, but all rings, necklaces, watches, or earrings that dangle are not allowed to be worn. In addition, hoodies and/or any loose or baggy clothing or clothing that has strings that dangle are not allowed.

Pedestrian walkways are identified with yellow lines painted on the ground. Everyone moving from area to area must stay in the walkways.

Cell phones may only be used while in the pedestrian walkways. Anyone using a cell phone must be at a complete standstill and safely in an identified pedestrian walkway. Cell phones may not be used while driving any vehicle.

In the case of an emergency, use the closest evacuation route, once outside the building you shall report to the guard house to be identified as present.

Plant WG has areas known to contain asbestos. If you are conducting construction or demolition work on either of the buildings, please ask your Plant Contact about possible asbestos in the construction area. The Plant Contact will arrange testing and possible asbestos remediation work as necessary.

Prop 65 Information – Shaw plant WG does have chemicals that when consumed can cause cancer, birth defects or other reproductive harm. If you have questions about any chemicals you may be exposed to, please ask your Plant Contact person for the SDS of any of these chemicals.

SDS are available upon request. Please ask your Plant Contact person.

If any problems or concerns need to be addressed, please ask your Plant Contact person.

This form must be completed as acknowledgement of the Plant Specific Safety Standards. ([PSSS Form](#))
